

## 5 reasons why to buy a Yale padlock

- Yale, a reputable brand in the marketplace with a history dating back to 1843 and one of the oldest brands in the world

- A loyal brand with **97%** brand recognition
- Sourced from accredited factories with a dedicated sourcing and quality team visiting the factories regularly
- Extensive range that includes travel, general purpose, outdoor and commercial security
- A trusted range of padlocks that are tested to **EN12320:2001**

## Testing

### Background to testing programme

Yale locks and accessories are tested extensively, ensuring Yale's exacting high standards are consistent throughout the entire design and production process – this is why Yale products are the best in their class.

#### Simulated attack testing

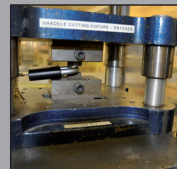

The tests simulate various forms of attack on a padlock and accessory with common hand tools.

These tests are far more severe than would normally be encountered. CEN testing is extremely stringent. A padlock must pass all ten test requirements to be included in a particular grade. If they fail in just one, the padlock automatically drops to a lower grade.

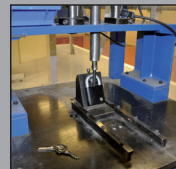

Here are some examples of tests performed.

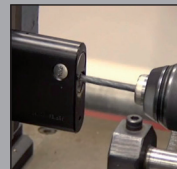

Shackle pulling or wedging

Shackle cutting

Impacting the padlock

Padlock drilling

Shackle sawing

#### CEN Rating

CEN sets the European Standards for padlocks and padlock fitting. Security ratings are awarded with the highest being 6 to the lowest being 1.

Many of Yale padlocks reach the CEN standard, offering the reassurance that the products have been manufactured and tested to meet the highest standards.

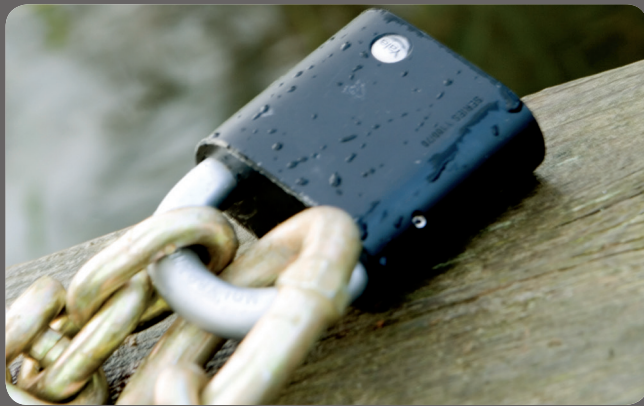

## Range & POS

## Yale Padlocks

Yale offer a comprehensive range of padlocks which are ideal for all applications whether your requirement is for commercial, industrial or residential use.

The Yale padlock range includes open and closed variants to suit the particular application, as well as a choice of hardened steel, bronze or brass, Boron & molybdenum shackle.

In addition Yale have developed a range of cables and bike locks, hasp and staples to complement the padlock range.

To help choose the right padlock Yale have introduced a performance rating on residential padlocks so that you can be reassured that the security level meets your requirements. This is based on the CEN rating.

## Strength Ratings Explained

### Strength Rating 1 – 10

**Standard** 1-3 Blue,  
**High** 4-6 Green,
